## Overview of U.S. MICAST Experiments

- ▶ Two space samples:  
MICAST6 and MICAST7
- ▶ Directional solidification from monocrystalline seed
- ▶ Al-7 wt pct Si alloy (hypoeutectic)

- ▶ Nominally **constant gradient** for each
- ▶ **Two solidification rates** in each
- ▶ **Matching terrestrial experiments** (Tewari)

### $\mu$ g Solidification of Al-7Si

Erdmann, Tewari,  
Grugel, Poirier

#### Background

Experimental Apparatus  
U.S. MICAST Overview  
Science Objectives  
Experiment Design

#### Results

First Sample: M6  
Thermal Conditions  
Sample Appearance  
Microstructure

## Science Objectives

- ▶ Investigate influence of gravity on **dendrite placement and morphology**
  - ▶ Steady-state, fully-developed microstructure
  - ▶ PDAS, SDAS
  - ▶ Selection mechanisms in transitions
- ▶ Investigate influence of gravity on **macrosegregation**

$\mu$ g Solidification of  
Al-7Si

Erdmann, Tewari,  
Grugel, Poirier

### Background

Experimental Apparatus

U.S. MICAST Overview

Science Objectives

Experiment Design

### Results

First Sample: M6

Thermal Conditions

Sample Appearance

Microstructure

Acceleration Data

Second Sample: M7

Sample Appearance

Microstructure

## Sample 1: Microstructure Sample Locations

Transverse and longitudinal sections taken along full sample length.

$\mu$ g Solidification of Al-7Si

Erdmann, Tewari, Grugel, Poirier

### Background

Experimental Apparatus  
U.S. MICAST Overview  
Science Objectives  
Experiment Design

### Results

First Sample: M6  
Thermal Conditions  
Sample Appearance  
**Microstructure**  
Acceleration Data  
Second Sample: M7  
Sample Appearance  
Microstructure

### Future/Ongoing

### Summary

### Acknowledgements

## Image Analysis: Seamless Reconstruction

- ▶ Completely automated feature matching
- ▶ Automatic removal of non-uniform illumination
- ▶ Scale-space theory for multiscale blending
- ▶ No seams

$\mu$ g Solidification of Al-7Si

Erdmann, Tewari, Grugel, Poirier

### Background

Experimental Apparatus  
U.S. MICAST Overview  
Science Objectives  
Experiment Design

### Results

First Sample: M6  
Thermal Conditions  
Sample Appearance  
**Microstructure**  
Acceleration Data  
Second Sample: M7  
Sample Appearance  
Microstructure

### Future/Ongoing

### Summary

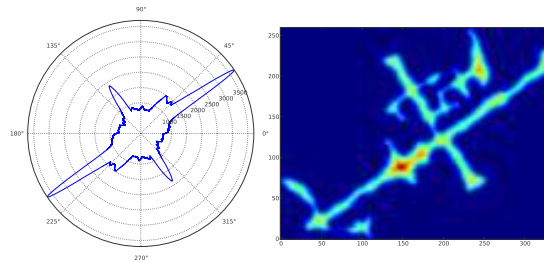

### Acknowledgements

## New Microstructural Analysis Technique

Input:

Output:

- ▶ Allows determination of cruciform orientation
- ▶ Applies to each cruciform
- ▶ Enables precise grain counting

$\mu$ g Solidification of  
Al-7Si

Erdmann, Tewari,  
Grugel, Poirier

### Background

Experimental Apparatus  
U.S. MICAST Overview  
Science Objectives  
Experiment Design

### Results

First Sample: M6  
Thermal Conditions  
Sample Appearance  
**Microstructure**  
Acceleration Data

Second Sample: M7  
Sample Appearance  
Microstructure

### Future/Ongoing

### Summary

### Acknowledgements

## Transverse Section M6-2: Terrestrial Seed Portion

gradient  $G = 40 \text{ K/cm}$ , velocity  $R = 22 \text{ }\mu\text{m/s}$

$\mu\text{g}$  Solidification of  
Al-7Si

Erdmann, Tewari,  
Grugel, Poirier

## Survey of Longitudinal Sections

From seed through slow growth, transition to fast growth.

$\mu$ g Solidification of Al-7Si

Erdmann, Tewari, Grugel, Poirier

### Background

- Experimental Apparatus
- U.S. MICAST Overview
- Science Objectives
- Experiment Design

### Results

- First Sample: M6
  - Thermal Conditions
  - Sample Appearance
  - Microstructure
  - Acceleration Data
- Second Sample: M7
  - Sample Appearance
  - Microstructure

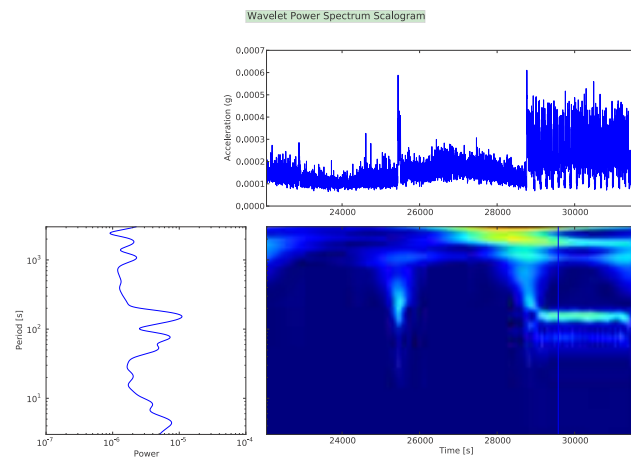

### Future/Ongoing

### Summary

### Acknowledgements

## Accelerations

- ▶ Experiment performed during crew sleep.
- ▶ Sample held fixed, furnace is moved.
- ▶ Minimal acceleration is critical.
- ▶ Anomalous accelerations encountered.

$\mu$ g Solidification of  
Al-7Si

Erdmann, Tewari,  
Grugel, Poirier

### Background

Experimental Apparatus  
U.S. MICAST Overview  
Science Objectives  
Experiment Design

### Results

First Sample: M6  
Thermal Conditions  
Sample Appearance  
Microstructure  
**Acceleration Data**  
Second Sample: M7  
Sample Appearance  
Microstructure

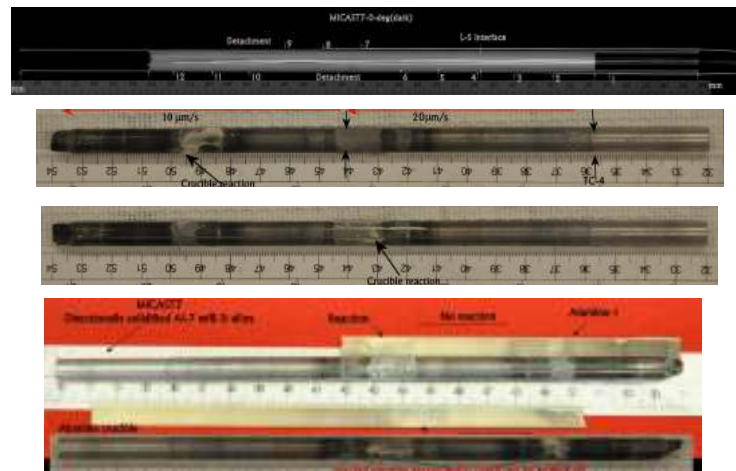

### Future/Ongoing

### Summary

### Acknowledgements

## Sample 2 (M7): Appearance After Crucible Removal

- ▶ Evidence of metal-crucible reactions.
- ▶ Evidence of metal free surface due to non-wetting.

$\mu$ g Solidification of Al-7Si

Erdmann, Tewari, Grugel, Poirier

### Background

Experimental Apparatus  
U.S. MICAST Overview  
Science Objectives  
Experiment Design

### Results

First Sample: M6  
Thermal Conditions  
Sample Appearance  
Microstructure  
Acceleration Data  
Second Sample: M7  
Sample Appearance  
Microstructure

### Future/Ongoing

### Summary

### Acknowledgements

## Early Survey of Transverse Sections

gradient  $G = 28\text{--}30\text{ K/cm}$

From fast growth through transition to slow growth.

$\mu\text{g}$  Solidification of  
Al-7Si

Erdmann, Tewari,  
Grugel, Poirier

### Background

Experimental Apparatus  
U.S. MICAST Overview  
Science Objectives  
Experiment Design

### Results

First Sample: M6  
Thermal Conditions  
Sample Appearance  
Microstructure  
Acceleration Data  
Second Sample: M7  
Sample Appearance  
Microstructure

### Future/Ongoing

### Summary

### Acknowledgements

## Micromilling for 3-D Reconstruction

- ▶ Micromilling
- ▶ 5 micron spacing
- ▶ optical microscopy at high magnification
- ▶ Stacked to obtain 3-D structure
- ▶ Will be used for longitudinal (shown) and transverse sections

$\mu$ g Solidification of Al-7Si

Erdmann, Tewari, Grugel, Poirier

### Background

Experimental Apparatus  
U.S. MICAST Overview  
Science Objectives  
Experiment Design

### Results

First Sample: M6  
Thermal Conditions  
Sample Appearance  
Microstructure  
Acceleration Data  
Second Sample: M7  
Sample Appearance  
Microstructure

### Future/Ongoing

Summary

Acknowledgements

## New Image Analysis Technique

- ▶ For reconstructing 3-D structures  
**need high-quality images**
- ▶ Micromilling causes severe artifacts
- ▶ Developed new hybrid wavelet-FFT identification and **removal of machining scratches**.
- ▶ Still in active development

$\mu$ g Solidification of  
Al-7Si

Erdmann, Tewari,  
Grugel, Poirier

### Background

Experimental Apparatus  
U.S. MICAST Overview  
Science Objectives  
Experiment Design

### Results

First Sample: M6  
Thermal Conditions  
Sample Appearance  
Microstructure  
Acceleration Data  
Second Sample: M7  
Sample Appearance  
Microstructure

### Future/Ongoing

Summary

## Future: Spacing/Regularity Analysis

- Voronoi diagram of cruciform centers of mass

$\mu$ g Solidification of  
Al-7Si

Erdmann, Tewari,  
Grugel, Poirier

### Background

Experimental Apparatus  
U.S. MICAST Overview  
Science Objectives  
Experiment Design

### Results

First Sample: M6  
Thermal Conditions  
Sample Appearance  
Microstructure  
Acceleration Data  
Second Sample: M7  
Sample Appearance  
Microstructure

### Future/Ongoing

Summary

Acknowledgements

## Future Analysis

- ▶ Micromilling of most of the sample in alternating transverse and longitudinal orientations.
- ▶ 3D reconstruction of microstructure
- ▶ Complete characterization of dendrite geometry
  - ▶ Usual average PDAS based on number per unit area
  - ▶ Histograms based on distances to centers of all other dendrites (1st neighbor distance, 2nd neighbor distance, etc.)
- ▶ Characterization and modeling of segregation

$\mu$ g Solidification of  
Al-7Si

Erdmann, Tewari,  
Grugel, Poirier

### Background

Experimental Apparatus  
U.S. MICAST Overview  
Science Objectives  
Experiment Design

### Results

First Sample: M6  
Thermal Conditions  
Sample Appearance  
Microstructure  
Acceleration Data  
Second Sample: M7  
Sample Appearance  
Microstructure

### Future/Ongoing

Summary

Acknowledgements

## Summary

- ▶ Analysis of both ISS samples is progressing
- ▶ Matching terrestrial experiments done
- ▶ Several new image-processing techniques developed to gain maximum value from samples
